

REFRACTORY CRUCIBLES de bioSiC[®]

Biomorphic EBT S.L. produces a wide range of standard models of refractory crucibles. We offer great flexibility of manufacturing according to customer's specifications.

The refractory crucibles can be used to melt metals, glass, alloys in the manufacture of ceramics and special applications in jewelry and dentistry.

The bioSiC[®] presents excellent thermomechanical properties and chemical stability.

All our crucibles may be accompanied by bioSiC[®] lids.

By the same means, biomorphic manufactures a variety of auxiliary laboratory elements with good mechanical properties at high temperature.

Technical Characteristics

Rectangular Crucibles - Ref. PNAV-001 / PNAV-003 / PNAV-005

REFERENCE	PNAV - 001	PNAV - 003	PNAV - 005
LENGHT (mm)	80	80	80
WIDTH (mm)	30	30	40
HEIGHT (mm)	10	15	15

Rectangular Crucibles with Compartments

Ref. PNAV-002 / PNAV-004

REFERENCE	PNAV - 002 (Two compartments)	PNAV - 004 (Three compartments)
LENGHT (mm)	80	80
WIDTH (mm)	40	40
HEIGHT (mm)	15	15

Cylindrical Crucibles - Ref. PNAV-007 / PNAV-008

REFERENCE	PNAV - 007	PNAV - 008
EXTERNAL DIAMETER (mm)	30	75
INTERNAL DIAMETER (mm)	26	70
HEIGHT (mm)	15	15
